

YOUR VISION.

Needs. Analysis. Recommendations. Plan.

Highways

1. Ice Breaker Visions

- Needs to take better advantage of existing waterways. Focus on marine highways.
- Better organized and prioritized in the interest of congestion and safety.
- More alternatives.
- Safety and efficiency.
- System in state of good repair. Maintenance and preservation.
- Existing infrastructure is safe and sound. Capacity secondary.
- Steady infrastructure investments.
- Improve connectivity.
- Need a well functioning system- maintenance and new technology.
- More public transportation.
- Bike-ped infrastructure.
- Transportation on waterways- rivers.
- Properly maintained, safe infrastructure that meets the public needs. (Bridges)
- Multi-modal transportation with low environmental impact.
- Safe and convenient transportation with low emissions. Minimize negative climate and public health impacts.
- Access and mobility.

2. Trends and Issues

List

- Driver behavior and safety.
- Dependence on driving.
- Access to services- health care. Accessibility.
- Public financing transparency.
- Demographics. Aging and brain drain
- Home to work access.
- State of good repair- aging infrastructure.
- Technology- ITS, Social media, Automated Vehicles (self driving cars)

Top 5

- Congestion-dependence on driving
- Aging infrastructure
- Connectivity
- Infrastructure Financing
- Technology and information

3. Transportation Investments

List

- Maintenance and capital improvements- state of good repair.
- Mass transit and alternative modes
- Improving efficiency
- Project financing- alternative sources of funding (PPP)
- Prioritizing projects
- Safety- driver education and improving enforcement
- Design improvements

Top 2

- Maintenance and capital improvements- state of good repair.
- Project financing- alternative sources of funding (Eg-PPP)
